CITA provides three services to help Charities be more effective through their use of technology.

Tech Surgery: Don't know where to start on IT issues? Want to discuss your IT set up with an independent expert? Our 2 hour Tech Surgery is designed to help you understand how IT can help support your charity and what options might be available.

IT Consultancy: Do you need help to define and scope an IT related project? If you have identified a requirement for a specific IT project our service can match you with an independent Volunteer who can help you define and scope your project.

IT Project Delivery: Do you need some hands-on help to implement an IT related project? Our IT Project Delivery service helps Charities find the right technical skills for an IT project.

Help non-profits realise the opportunities and implications of technology, so they can continue to champion and support the most vulnerable. We've helped hundreds of non-profit leaders, frontline staff and trustees put digital at the heart of their service delivery, strategy and culture. Run workshops on developing digital services and have developed 10 digital design principles for designing digital services.

Tech for Better Programme: A programme for social impact start-ups and non-profits to learn how to design, build and test new digital services, working with developers in London and Palestine, and supported by [Intersticia](#).

<https://superhighways.org.uk/training-advice-and-technical/data-skills/>

Datawise London is a partnership programme of training, advice and support to help small charities and community organisations in London better use data to meet the needs of Londoners. With a robust evidence base small organisations are more likely to be heard and influence stakeholders and decision makers.
