

Help needed for research!

Do you think you had Covid 3+ months ago?

Have you experienced any of these symptoms for at least two months not explained by any other health condition?

- Exhaustion
- Brain fog
- Memory problems
- Concentration problems
- Occasional confusion
- Breathlessness

- Headache
- Muscle aches
- Palpitations
- Chest tightness, pressure or pain
- Dizziness
- Sleep disturbance
- Joint pain

Do these symptoms affect your daily life?
If so, you might have
Long Covid..

As part of the STIMULATE-ICP study, we are researching Long Covid and would like to talk to you about your experiences.

We are offering a £15 shopping voucher as a token of appreciation for participation.
